S++++		

### Reset Button

Press and hold the RST button for more than 10s to reset the router to its factory mode.

## Set Up the Network

### 1. Connect your device to the router wirelessly or with an Ethernet cable.

#### • Wired connection

Connect the computer to the router's LAN port using an Ethernet cable.

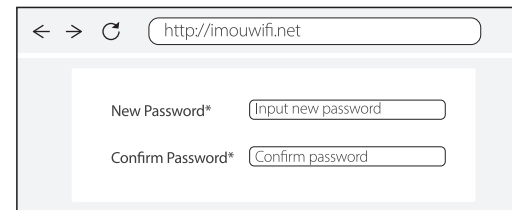

#### • Wireless connection

Find the SSID printed on the label of the router.

Go to the Wi-Fi settings of your device, and then select the SSID to join in the network.

### 2. Launch a web browser on the device connected to the Wi-Fi network, and visit <http://imouwifi.net>.

Set a password to log in. Follow the on-screen instructions to set up the internet connection.

## FAQ

1.2.98.02.10017

### Q1: What should I do if I forget my web management password?

- Use a pin to press and hold the **RESET** button on the real panel on the router for over 10 seconds to restore the router to the factory settings.
- When the router is powered on, reconnect your device to the router (wired or wireless). Then, launch a web browser and visit <http://imouwifi.net> to reset a password.

### Q2: What should I do if I can't access the router's management page?

- Reboot your router and try again.
- Check your Wi-Fi connection.
- Use another Web browser such as Google Chrome.
- Restart your device.

### Q3: What can I do if my Wi-Fi devices cannot connect over Wi-Fi to the router?

Please try to check:

- You have enabled the router's SSID network broadcast and displays in your Wi-Fi client's scanning list.
- You have entered the correct Wi-Fi password when connecting your devices to the Wi-Fi network.

If you failed to address the problem, you can reset the router to factory default settings.

### Q4: What can I do when there is no internet connection using 4G SIM card?

- Test the SIM card on another 4G device or smartphone to make sure the SIM card itself is working properly.
- Confirm that there is enough balance on the SIM card.
