## How to add IPSAN to NVR

### Description

NVR which supports NFS/iSCSI protocol can add up to 8 \* 8T Net HDD including IPSAN or NAS.

**Note:** This function can be configured in website and local GUI.

### Preparation

NVR, Computer, Network cable, Net HDD

#### 1) In the web of NVR.

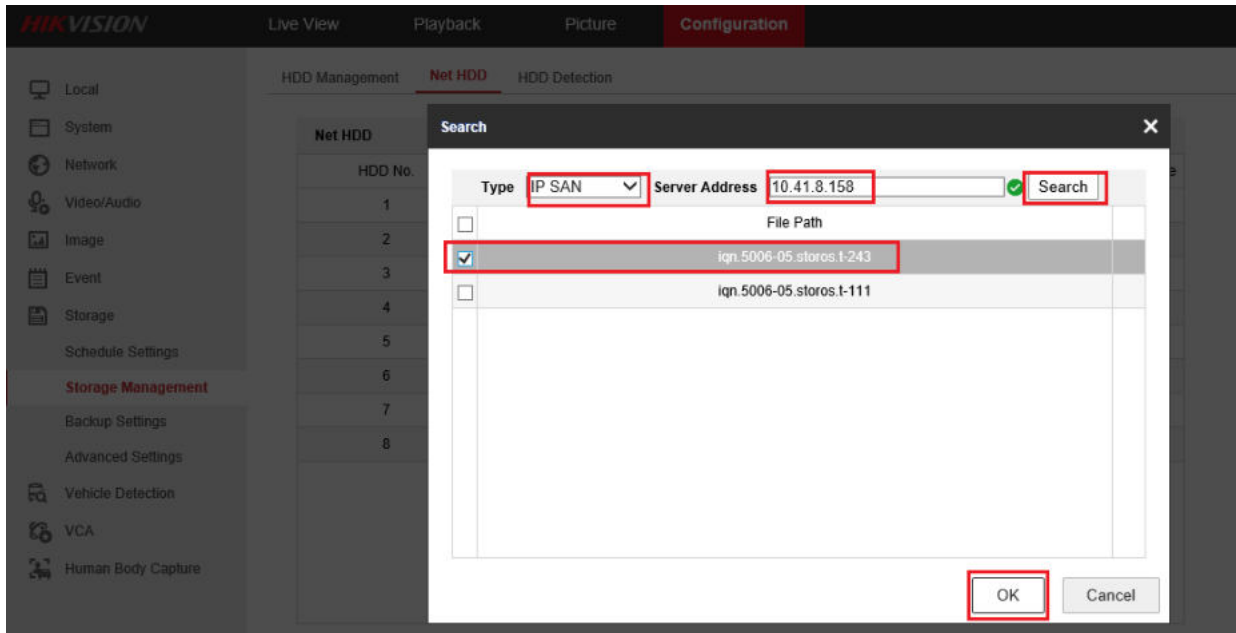

**Steps:**

1. Enter **Configuration** interface and **Storage Management—Net HDD**
2. Click ‘**Search**’ button, and choose ‘**IP SAN**’. Then enter the IP address, click ‘**Search**’ and choose the ‘**File Path**’. Click ‘**OK**’ button, and finish to add.

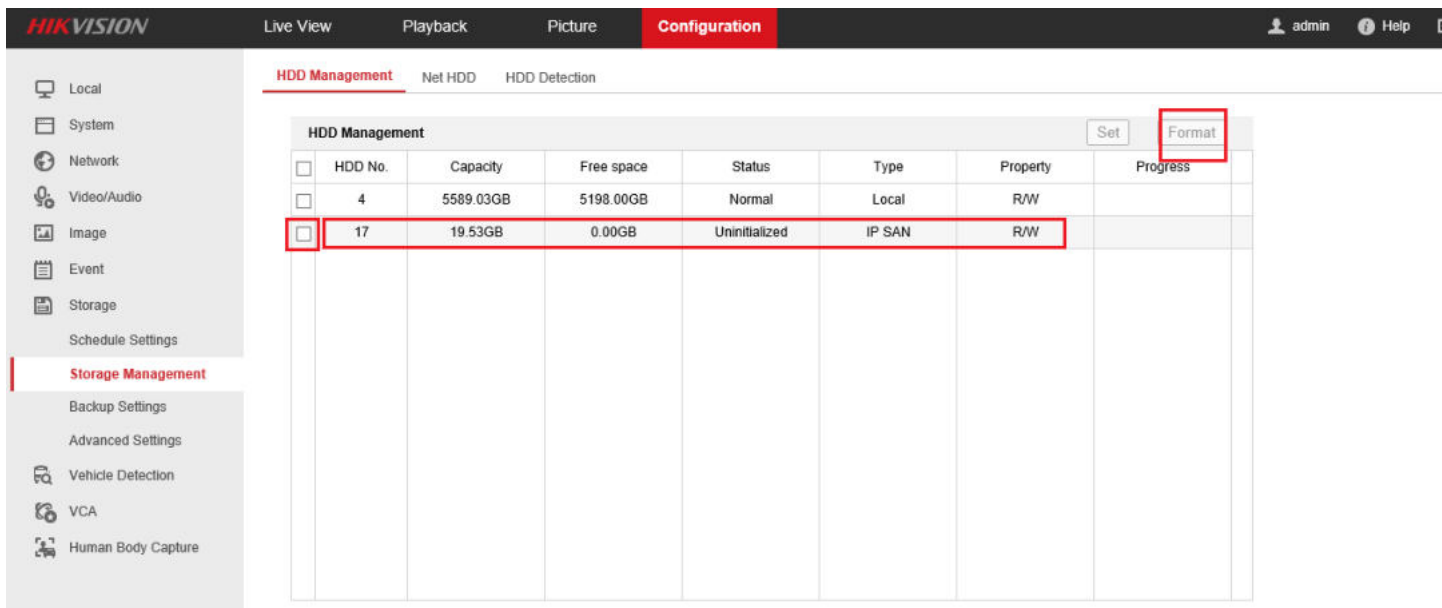

The screenshot shows the Hikvision NVR web interface. The top navigation bar includes 'Live View', 'Playback', 'Picture', and 'Configuration' (which is highlighted). The left sidebar contains various menu items, with 'Storage Management' highlighted. The main content area shows the 'Net HDD' configuration page. At the top of this page, there are tabs for 'HDD Management', 'Net HDD' (which is selected), and 'HDD Detection'. Below the tabs is a table with the following columns: 'HDD No.', 'Server Address', 'File Path', 'Type', and 'Delete'. The table contains 8 rows, each with a 'Delete' button (marked with a red 'X'). A 'Search' button is located in the top right corner of the table area. At the bottom of the page, there is a 'Save' button.

HDD No.	Server Address	File Path	Type	Delete
1			NAS	X
2			NAS	X
3			NAS	X
4			NAS	X
5			NAS	X
6			NAS	X
7			NAS	X
8			NAS	X
