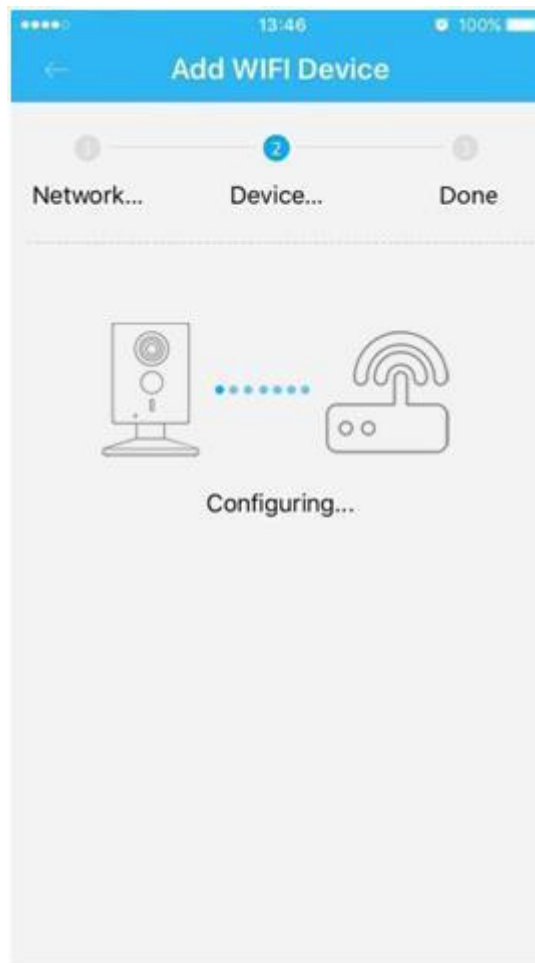

Figure 3-6

Note: If you want to change the Wi-Fi signal, please reset the camera to factory default and repeat step 5-8;

4 Device Installation

Important

Before the installation, please make sure the installation environment can at least support 3x weight of the camera.

Figure 4-1

Please see Figure 4-1 and Figure 4-2.

Step 1

Dig holes on the installation surface (wall or ceiling).

Step 2

Open accessories bag, take out expansion bolt and insert it into the hole you just dug.

Step 3

Open accessories bag, take out installation screws. Tighten the screws to fix the device on the installation surface (wall or ceiling). You can move device sunshade back and forth. When you have fixed the device, you must tighten screws on sunshade.

Step 4

Plug external wiring of the device properly.

Figure 4-2

Step 5

Use cross screwdriver (in accessories bag) to loosen adjusting screw.

Step 6

Adjust the device in all possible directions, and set its monitoring direction according to the requirements.

Step 7

Use cross screwdriver to tighten the adjusting screws.
